

Project 2 Requirements: Assigned 9/4/18

Due Thursday 9/6:

- Elevator pitch
- 10-15 user stories
- Link to GitHub Repo
- Slack group/channel
- Team name
- Team Lead
- Send in format of documentation on github repo

Due Friday 9/7:

- ERD
- Plan for first sprint in backlog

GITFLOW

- Each team will have its own Github repository which will have a master branch deployed on an EC2 instance, and a dev branch for regular CI
- Feature branches specific to user stories/tasks will be made off of dev
- Master and dev branches will be protected. Pull requests must be made for each merge and approved by designated teammate
- Do **not** change more than 5 files in a single [pull request](#)

SCRUM

- We will have two sprints 9/4-9/9, and 9/10-9/17.
- Presentations will be Monday September 10, 2018
- Use [GitHub Issues](#) to track your user stories. You can use other technologies such as Trello but your GitHub repo should have everything including the stories and a detailed wiki
- Point your stories according to the [Fibonacci method](#)

TECH STACK & REQUIREMENTS

- Java, AWS RDS, CI/CD pipeline(EC2, Maven, Jenkins, GitHub, Slack), Hibernate/Spring ORM/Spring Data, Spring MVC, Angular, Bootstrap
- Logging and unit testing
- Detailed Documentation. Check out the [Rideshare app repo](#) for reference
